Professional Summary

Computer Science student specializing in Artificial Intelligence with experience in software development, machine learning, and full-stack applications. Proficient in Python, Java, C++, JavaScript, and modern development frameworks. Built AI-powered systems using NLP, computer vision, and Retrieval-Augmented Generation (RAG). Passionate about scalable software systems, intelligent applications, and solving real-world engineering problems through collaborative development.

Technical Skills

Programming Languages:

Python, Java, C++, JavaScript, PHP

Frameworks:

React.js, Node.js, Tailwind CSS, REST APIs

Machine Learning & AI:

TensorFlow, PyTorch, Scikit-learn, CNNs, YOLO, NLP, RAG Systems, Prompt Engineering

Deep Learning:

Convolutional Neural Networks (CNN), YOLO object detection, transfer learning, custom model training, TensorFlow, Keras

Libraries and Tools:

NumPy, Pandas, Matplotlib, Scikit-learn, Ultralytics YOLO, Google Colab, Git, GitHub

Backend:

Fast API, Flask, Nest.js, Django

Databases:

MongoDB, PostgreSQL, My SQL, Redis

Projects

DermSight — AI-Based Skin Disease Analysis System

- Developed a multimodal AI application combining computer vision and symptom-based text analysis for early skin disease assessment.
- Built image classification and risk prediction pipelines using Python, TensorFlow, and CNN architectures.
- Implemented explainable AI recommendations to improve user understanding of prediction results.
- Collaborated in a hackathon environment and secured 5th rank in the SWALAMBH Hackathon.
- Technologies: Python, TensorFlow, CNN, React.js, Node.js

Project Link : <https://dermsight.netlify.app/>

CampusFlow — AI-Powered College Enquiry Chatbot

- Developed an AI-powered chatbot using Retrieval-Augmented Generation (RAG) architecture for answering college-related queries.
- Integrated Serper API and Claude AI to retrieve and process real-time institutional data.
- Built backend workflows for contextual information retrieval and response generation.
- Improved query relevance for information related to placements, fees, departments, and campus facilities.
- Technologies: Python, JavaScript, Node.js, APIs, NLP, RAG

Project Link : <https://github.com/EklawayaChauhan/CampusFlow>

Education

- **Diploma in Computer Science and Engineering (2024)**
Wainganga College Of Engineering and management, Nagpur
Percentage 81.82%

- **B.Tech in Artificial Intelligence (Expected 2027)**

St. Vincent Pallotti College of Engineering and Technology, Nagpur
CGPA: 8.44 / 10

Certifications & Achievements

- AI foundation Associate – Oracle
- *Model Context Protocol: Advanced Topics* certification by Anthropic.
- 5th Rank – SWALAMBH, SVP CET
- Participated in multiple technical competitions, hackathons,
